## JUNIOR SOFTWARE DEVELOPER

PROGRAMMING | AGILE METHODOLOGIES | UI/UX DESIGN

- Result-oriented student of Software Engineering Technology Advanced Diploma, with applied project experience in front-end development, database management, and requirements engineering through hands-on project work
- Strong foundation in object-oriented programming, user-centred design, and applying software requirements principles to build functional applications.
- Fluent in English and Russian; leverages cross-functional communication and Agile teamwork to align technical solutions with project goals.
- Applied modern programming languages including Java, SQL, C#, JavaScript, Python, and HTML/CSS to develop reliable software solutions.
- Utilized development frameworks and cloud platforms such as Streamlit, ReportLab, SQLite, React, and Streamlit Community Cloud for rapid application deployments.
- Collaborated effectively in team environments using Jira, GitHub, and Git Version Control for streamlined software development workflows.
- Maintained high academic standing with a 4.3/4.5 GPA while actively engaging in complex technical projects and practical engineering tasks.

## TECHNICAL SKILLS

|                                    |                                                               |
|------------------------------------|---------------------------------------------------------------|
| <b>Programming:</b>                | Java, SQL, C#, JavaScript, HTML/CSS, Python                   |
| <b>Frameworks &amp; Libraries:</b> | Streamlit, ReportLab, SQLite                                  |
| <b>Operating Systems:</b>          | Windows, Ubuntu                                               |
| <b>Development Tools:</b>          | VS Code, PyCharm, Visual Studio Code, IntelliJ, SQL Developer |
| <b>Cloud Computing:</b>            | Streamlit Community Cloud, GitHub                             |
| <b>Other Tools:</b>                | Jira, MS Office, Google Docs                                  |

## EDUCATION

|                                                                 |                        |
|-----------------------------------------------------------------|------------------------|
| <b>Software Engineering Technology (Co-op) Advanced Diploma</b> | January 2026 - Present |
| Centennial College, Toronto, ON                                 | GPA: 4.3/4.5(A)        |

**Relevant Courses:** Database Concepts (SQL) | Java Programming | Web Interface Design | Software Requirements | Software System Design | Client-Side Web Development | C# Programming | Python Programming

|                                                                                                   |                            |
|---------------------------------------------------------------------------------------------------|----------------------------|
| <b>Oil &amp; Gas Field Development</b>                                                            | September 2001 – July 2006 |
| Kuban State Technological University, Krasnodar, Russia<br>(diploma was evaluated by WES and CES) | Summa Cum Laude equivalent |

**Relevant Courses:** Engineering Standards (GOST, SNiP) and technical documentation | Oil & Gas Infrastructure | P&IDs | AutoCAD | MicroStation | Technical Automation | Bentley 3D | Aveva

---

## ACADEMIC PROJECTS EXPERIENCE

### Software Requirements Specification: MatchMyHome Application

- Authored and structured a comprehensive 61-page software requirements specification enforcing strict typographic standards and identifier conventions.
- Collaborated in a 4-member team to design use case diagrams, sequence diagrams, and swimlane workflows for the matching engine.
- Documented functional and non-functional requirements, mapping out user classes, compliance rules, and external interface specifications.

### Database Concepts: Velocity Car Rental Enterprise

- Designed, structured, and populated core tables within an Oracle SQL relational database adhering to Third Normal Form (3NF).
- Developed core business requirement queries (vehicle discovery and reservation management) using advanced SQL joins and filters.
- Partnered in a 4-member team to format a complete 90+ page enterprise database design specification document.

### Software Engineering Fundamentals: JSEK Marketplace (<https://github.com/Julia-Cameron/jsek-marketplace-project>)

- Built core buyer flows (landing, auth, checkout, receipt) for a responsive e-commerce demo using HTML, CSS, and JavaScript.
- Implemented card validation with Luhn checksum, live card brand detection, and simulated decline scenarios.
- Developed a persistent buyer dashboard with cart management using localStorage for a complete end-to-end purchase flow.
- Generated itemized, tax-calculated receipts with print and email options while collaborating via Git and Jira.

### Web Application Design

- Designed and implemented user-friendly web forms independently using HTML structures and CSS styling.
- Built custom, visually engaging image and content galleries applying modern front-end styling and interactive scripting.
- Developed a functional, responsive real estate web page to showcase property listings and layouts (<https://github.com/Julia-Cameron/realestate-portfolio-site>).

## JOB EXPERIENCE

### Sales Associate

September 2026 – Present

PUMA Outlet, Windsor, ON

- Drives store sales and operations by providing energetic customer service to over 45 customers daily.
- Accurately processes 100+ daily transactions using a POS (point-of-sale) system with zero discrepancies.
- Maintains PUMA visual merchandising and inventory standards across 3 distinct store zones.

## ADDITIONAL EXPERIENCE

### Senior Drafting Engineer

July 2006 – December 2017

Rosneft, Krasnodar, Russia

- Created and updated over 400 complex P&IDs, plant layouts, and technical drawings following strict industry standards.
- Worked closely with 5+ mechanical engineers and site teams daily to fix design clashes and sort out drawing packages.
- Checked technical documentation for quality before final approval, ensuring 100% compliance with engineering standards.
- Trained over 15 junior drafters on internal workflows and drafting standards.
